The list above includes companies with which IntraCare is directly contracted, as well as, some of the health plans which access the behavioral health networks of those companies. It is not possible to list every insurance company which may include IntraCare in its network. If your health plan is not listed, please call and our Intake Department staff can help determine whether IntraCare is in your network.

In some cases only one of the hospitals may be in network with a particular health plan. Again, our Intake Department can help you determine this.

Individual benefits for behavioral health services vary among health plans. **Whenever possible, it is best to call ahead and provide the Intake Department with your specific insurance information so that we can attempt to verify your benefits before you arrive at the hospital.**
